NOVA 30-Day Job Preparation Strategy

Created by NOVA | 26 October 2026

Goal

Prepare for entry-level software developer roles through Python, SQL, DSA, projects, and mock interviews.

Week 1: Fundamentals

Days 1-3: Revise Python basics.
Days 4-5: Practice SQL queries.
Days 6-7: Solve beginner coding problems.

Week 2: Problem Solving

Practice arrays, strings, dictionaries, and basic data structures.

Week 3: Projects and Interviews

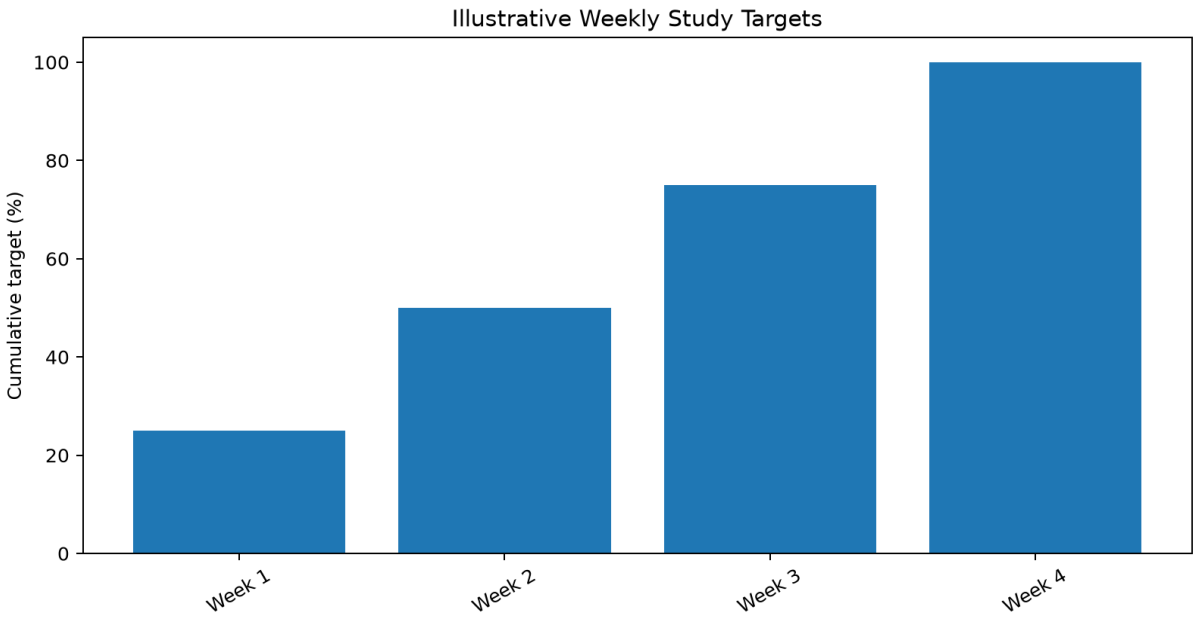

Revise your projects, practice explaining your code, and complete mock interviews.

Week 4: Applications and Revision

Improve your resume, apply to suitable jobs, revise weak topics, and practice interviews daily.

Week	Focus	Target
Week 1	Python and SQL	Revise fundamentals
Week 2	DSA	Solve practice problems
Week 3	Projects	Prepare project explanations
Week 4	Revision	Apply and practise interviews
